

October 2005 Newsletter

[EngineerAid Promoted by Institute of Electrical Engineering \(IEE\)](#)

An article published by *IEE Review Careers* in the October 2005 issue has allowed EngineerAid to attract many Electrical Engineers of various specialisations into volunteering. It is anticipated that further PR by IEE will lead to a substantial increase in the numbers of Electrical Engineers continuing to volunteer. By volunteering Electrical Engineers will be presented with opportunities to apply their specialist knowledge and skills to development projects in third world countries.

[EngineerAid Working to Play Its Part in South Asian Earthquake Relief](#)

EngineerAid's proposal to support the South Asian Earthquake relief program has been highly welcomed by the Pakistan High Commission and the Pakistan Engineering Council (PEC). EngineerAid has offered to aid in the reconstruction of devastated areas where the earthquake struck on October 8th 2005, demolishing vast areas and

killing thousands of people living in these regions. EngineerAid is in contact with 'Relief Teams' in the affected

provinces, awaiting details of development projects as they start to take place.

EngineerAid is also in discussions with PEC to see how best the two organisations can work collectively in the long term future.

[EngineerAid Looking to Acquire Further Funding as it Transitions into Its Next Strategic Phase](#)

After the success of EngineerAid's Pilot Project, SIE and Napier University are continuing their support in the form of funding and resources. EngineerAid is seeking further external funding in order to transition into its next phase as it becomes registered as a charity organisation and establishes itself to its full potential on a global scale.
